Advance Mitigation

- Siting projects can create wetland impacts.
- Impacts need to be mitigated.
- Advance mitigation can combine multiple project impacts into one mitigation site OR meet one project’s needs.
- Creates a single user mitigation site.

Methods

1. Anticipate impacts
2. Use the Advance Mitigation permit process to offset impacts

Results

- Get mitigation approved and in the ground before you need it
- Mitigation gains value over time
- Save time and money
- Streamlines permitting for all covered projects

Discussion

- Anticipate impacts
- Offset impacts with Advance Mitigation
- Expedite siting permitting
